

We are looking for you as **Revit designer (m/f/d)**

Your benefits

- In our projects for renowned customers at home and abroad, you can decisively advance our design and our process engineering systems with your skills and ideas in a highly motivated team on a full- or part-time basis or as a freelancer.
- You will work with experienced engineers who will support you in your personal development.
- We offer you the greatest possible flexibility, mobile working is of course possible.
- We offer you an attractive remuneration package as well as various benefits such as a contribution to the company pension scheme, subsidized membership of the Urban Sports Club, company events, further training opportunities and much more.
- An open and motivated team that supports you and in which you will feel comfortable.

Your tasks

- In close coordination with our technical project management, you design our process engineering systems for industrial water treatment in 3D and with BIM, ensuring compliance with the relevant standards and guidelines.
- You coordinate with our customers and system suppliers to optimize our plants and to ensure that there are no collisions.
- You prepare models for our prefabrication and assembly and create the necessary production documents.
- You create, maintain and expand our design databases and libraries.

Your profile

- With Revit MEP, no one can fool you.
- You are confident with Autodesk products (AutoCAD, Inventor, Naviswork, Fusion, Vault).
- Independence, structure, goal and team orientation are the attributes that characterize your way of working.
- You are a team player with excellent communication skills, who likes to work in a team and lives an open, proactive communication.
- You are motivated to find innovative solutions and always stay on the cutting edge of technology.

Interested?

Ready to shape the future of industrial water treatment together with us? Then simply send us your application to kkornder@dr-kornder.de. We look forward to hearing from you!

We are Dr. Kornder Anlagen- und Messtechnik GmbH & Co. KG. As a certified medium-sized family business, we have more than 20 years of international experience in the realization of projects for industrial water treatment.

In addition to process engineering systems for the treatment and processing of industrial water, we offer our customers reliable measurement and control technology as well as specially adapted treatment chemicals.

We guarantee our customers from innovative industries such as semiconductors/electronics, solar etc. the highest product qualities with our ultra-pure water technology and make a valuable contribution to ensuring high-quality ecological production with our waste water plants.

We are looking for you as our **Revit designer (m/f/d)** to strengthen our team. You have the opportunity to work with us on a **full- or part-time basis or as a freelancer.**
